

Little Sparks Science (7-11)

10 January 2025
Brilliant Birds

One of our experiments working towards children achieving their CREST SuperStar Award. In this experiment, children will find out how birds build their nests before building their own nest and testing how it withstands different weather conditions.

14 March 2025

Camouflaged Creatures

One of our experiments working towards children achieving their CREST SuperStar Award. In this experiment, children will investigate how camouflage can help animals to hide and why (linked to British Science Week's Change and Adapt theme).

14 February 2025
Fingerprint Folly

One of our experiments working towards children achieving their CREST SuperStar Award. In this experiment, children will investigate the best way to take fingerprints.

11 April 2025
Tumbling Toast

One of our experiments working towards children achieving their CREST SuperStar Award. In this experiment, children will develop an investigation to find out if toast really does always land butter side down.
